## Hill.py output

```
This is the total time: 1.00ms

[[0 0 0 1 0]

[1 0 0 0 0]

[0 0 1 0 0]

[0 0 0 0 1]

[0 1 0 0 0]]
```

Hill-climbing algorithm is generally faster and less computationally intensive

## Genetic.py output

```
C:\Users\Angel\AppData\Local\I
Running Time: 457.78ms
[[0 0 0 1 0]
  [1 0 0 0 0]
  [0 0 1 0 0]
  [0 0 1 0 0]
  [0 1 0 0 0]
```

Genetic generally takes long than hill-climbing
